In short, the ACS Chemistry Exams are 2 hour standardized tests that have a lot of mystery surrounding them (See link at bottom for more on the format).

Although, it's good to keep in mind that the exam is typically graded on a scale or compared to the national average. See a national average example at the link below:

Abstract. Students who must take a high-stakes final examination that covers a full year of the organic chemistry curriculum often wonder how best to prepare for such an assessment. Many institutions use the products from the American Chemical Society (ACS) Examinations Institute as one metric for student learning.

The usual process for writing a new exam takes a committee 2 years, Murphy says, but the institute produced sets of questions for general chemistry and organic chemistry, its most popular exams, in only 3 weeks. The question pools include more than 300 questions for the two courses, coded by semester, topic, and difficulty.

This practice exam is designed for the full-year ACS Organic Chemistry Exam. The idea is to take this as an exam, a timer is part of the exam, so that the practice exam simulates the timed-test environment. Students should avoid using notes while taking the practice test so that the experience is as close to taking an exam as possible.
