To its critics Alcoholics Anonymous (AA) is at best as a placebo, competing with more effective treatments and at worst a dangerous cult [1-4]. For its supporters the fact that AA received the Lasker Award (America's highest scientific prize for medical progress) seems quite justified [5, p.573]. But for many the jury remains out.

Charles Bufe begins *AA: Cult or Cure* with a description of a standard AA meeting—dominated by a few people who tell their same, self-serving stories for the umpteenth time, the proceedings unfocussed and unhelpful, the environment filled with smoke and other unhealthy environmental contaminants—from which most people leave with basic psychological and social needs unmet. This well researched, painstakingly documented book provides detailed information on the right-wing evangelical organization (Oxford Group Movement) that gave birth to AA; the relation of AA and its program to the Oxford Group Movement; AA's similarities to and differences from religious cults; AA's remarkable ineffectiveness; and the alternatives to AA. The greatly expanded second edition includes a new chapter on AA's relationship to the treatment industry, and AA's remarkable influence in the media.

An exposé of Alcoholics Anonymous, 12-step programs, and the rehab industry—and how a failed addiction-treatment model came to dominate America. AA has become so infused in our society that it is practically synonymous with addiction recovery. Yet the evidence shows that AA has only a 5-10 percent success rate—hardly better than no treatment at all. Despite this, doctors, employers, and judges regularly refer addicted people to treatment programs and rehab facilities based on the 12-step model. In *The Sober Truth*, acclaimed addiction specialist Dr. Lance Dodes exposes the deeply flawed science that the 12-step industry has used to support its programs. Dr. Dodes analyzes dozens of studies to reveal a startling pattern of errors, misjudgments, and biases. He also pores over the research to highlight the best peer-reviewed studies available and discovers that they reach a grim consensus on the program's overall success. But *The Sober Truth* is more than a book about addiction. It is also a book about science and how and why AA and rehab became so popular, despite the discouraging data. Dr. Dodes explores the entire story of AA's rise, from its origins in early fundamentalist religious and mystical beliefs to its present-day place of privilege in politics and media. *The Sober Truth* includes true stories from Dr. Dodes's thirty-five years of clinical practice, as well as firsthand accounts submitted by addicts through an open invitation on the Psychology Today website. These stories vividly reveal the experience of walking the steps and attending some of the nation's most famous rehabilitation centers. *The Sober Truth* builds a powerful response to the monopoly of the 12-step program and explodes the myth that these programs offer an acceptable or universal solution to the deeply personal problem of addiction. This book offers new and actionable information for addicts, their families, and medical providers, and lays out better ways to understand addiction for those seeking a more effective and compassionate approach to this treatable problem.

In *US of AA*, Miller shares the never-before-told story of how in the aftermath of prohibition America's top scientists helped launch a movement that would give rise to a multi-million-dollar treatment industry and a new government agency devoted to alcoholism that has made available millions of dollars for research. Despite the fact that this research showed that alcoholism is a complex disease requiring an array of treatment strategies, among which Alcoholics Anonymous (AA) is one of the least effective, money continued to flow to treatment facilities using approaches similar to AA. Five years in the making, his brilliant, in-depth investigative reporting into the history, politics and science of alcoholism will show how AA became our nation's de facto treatment policy, even as evidence for more effective remedies accumulated. *US of AA* is a character-driven, beautifully written exposé, full of secrecy, irony, liquor industry money, the shrillest of scare tactics and, at its center, a grand deception. In the tradition of *Crazy* by Pete Earley, and David Goldhill's *Catastrophic Care*, *US of AA* shines a much-needed spotlight on the addiction treatment industry. It will forever change the way we think about the entire enterprise.

Looks at the cultural factors contributing to a rise in alcoholism among today's women and compares today's practices to those of earlier generations while noting the current ineffectiveness of AA and other mainstream treatments.

Winner of a 2018 Catholic Press Association Award: Sacraments. (Second Place). In the first book to directly integrate the Twelve Steps with the practice of Catholicism, Scott Weeman, founder and director of Catholic in Recovery, pairs his personal story with compassionate straight talk to show Catholics how to bridge the commonly felt gap between the Higher Power of twelve-step programs and the merciful God that he rediscovered in the heart of the sacraments. Weeman entered sobriety from alcohol and drugs on October 10, 2011, and he's made it his full-time ministry to help others who struggle with various types of addiction to find spiritual wholeness through Catholic in Recovery, an organization he founded and directs. In *The Twelve Steps and the Sacraments*, Weeman candidly tackles the struggle he and other addicts have with getting to know intimately the unnamed Higher Power of recovery. He shares stories of his compulsion to find a personal relationship with God and how his tentative steps back to the Catholic Church opened new doors of healing and brought him surprising joy as he came to know Christ in the sacraments. Catholics in recovery and those moving toward it, as well as the people who love them will recognize Weeman's story and his spiritual struggle to personally encounter God. He tells us how: Baptism helps you admit powerlessness over an unmanageable problem, face your desperate need for God, and choose to believe in and submit to God's mercy. Reconciliation affirms and strengthens the hard work of examining your life, admitting wrongs, and making amends. The Eucharist provides ongoing sustenance and draws you to the healing power of Christ. The graces of Confirmation strengthen each person to keep moving forward and to share the good news of recovery and new life in Christ. Weeman's words are boldly challenging and brimming with compassion and through them you will discover inspiration, hope, sage advice, and refreshingly practical help.

"*The Real AA*" is the result of Ken Ragge's journey through AA and its for-profit institutional variants. The book covers virtually all aspects of AA and the traditional treatment system: the disease theory of alcohol abuse; AA's origins and development; AA's ideology and indoctrination process; and AA's institutional forms. An invaluable resource to alcohol abusers, their friends, and their families.
