Lists records, superlatives, and unusual facts in the areas of fame, the natural world, exploration, technology, remarkable activities, the arts, amusements, and sports.

Lists records, superlatives, and unusual facts in the areas of fame, business, crime, the natural world, technology, war, the arts, music, fashion, and sports.

"Savvy and insightful." --New York Times Technology has become the architect of our intimacies. Online, we fall prey to the illusion of companionship, gathering thousands of Twitter and Facebook friends, and confusing tweets and wall posts with authentic communication. But this relentless connection leads to a deep solitude. MIT professor Sherry Turkle argues that as technology ramps up, our emotional lives ramp down. Based on hundreds of interviews and with a new introduction taking us to the present day, Alone Together describes changing, unsettling relationships between friends, lovers, and families.

American Indian customs, stories, and history come to life in this important and authoritative reference, artfully designed and packaged for kids and students. More than 160 tribes are featured in this outstanding new encyclopedia, which presents a comprehensive overview of the history of North America's Native peoples. From the Apache to the Zuni, readers will learn about each tribe's history, traditions, and culture, including the impact of European expansion across the land and how tribes live today. Features include maps of ancestral lands; timelines of important dates and events; fact boxes for each tribe; bios of influential American Indians such as Sitting Bull; sidebars on daily life, homes, food, clothing, jewelry, and games; Did You Know facts with photographs; and traditional Native stories. The design is compelling and colorful, packed with full-color photographs. To help give kids the lay of the land, this reference is arranged by region, and all federally recognized tribes are included. Tribal members representing each region and experts at the National Museum of the American Indian at the Smithsonian Institution were involved in its creation. With nothing comparable available, it is sure to be a valuable resource for kids, students, librarians, and families.

Phileas Fogg was enjoying a night of cards and conversation when the discussion turned to bank robbers. To prove his theory that the robber could be halfway across the globe, he makes a wager that he can travel around the world in 80 days. Can he win his bet? Find out in this stunning graphic novel adaptation of Jules Verne's classic by Rod Espinosa. Creator biographies and a glossary help reluctant readers take the first step on the road to classic literature.

Meet Ace and Bub, the flying beaver brothers! Ace loves extreme sports and is always looking for a new adventure. Bub loves napping and, well, napping. But when penguins threaten to freeze Beaver Island for "resort and polar-style living," the brothers put their talents to work saving their tropical island paradise. Can they save Beaver Island from environmental destruction? And can they do it in time to still win the annual Beaver Island Surfing Competition?

This influential book establishes the enduring vocabulary and concepts in the burgeoning field of knowledge management. It serves as the hands-on resource of choice for companies that recognize knowledge as the only sustainable source of competitive advantage going forward. Drawing from their work with more than thirty knowledge-rich firms, Davenport and Prusak--experienced consultants with a track record of success--examine how all types of companies can effectively understand, analyze, measure, and manage their intellectual assets, turning corporate wisdom into market value. They categorize knowledge work into four sequential activities--accessing, generating, embedding, and transferring--and look at the key skills, techniques, and processes of each. While they present a practical approach to cataloging and storing knowledge so that employees can easily leverage it throughout the firm, the authors caution readers on the limits of communications and information technology in managing intellectual capital.
