Juan Patricio is orphaned as a boy, but he grows up drawing strength from La Sierra Madre, the Mother Mountain that towers over his village. She is there for him always, whether he is toiling as a migrant worker or fighting in the Korean war. She inspires the artist in him, the carver of cedarwood. Part Hispanic, part native American, Juan is looked down upon by the gringos who treat him as a foreigner in the land of his birth. Yet he lives his life with a quiet dignity and purpose. *The Flesh of the Cedarwood* is a touching, poetic novel honoring the achievements of the many Hispanics and native Americans forced to live in poverty, and treated as an inferior and as a foreigner in his own land, themes that have never been more current in our society.

The United States Social Security Administration (SSA) administers two disability programs: Social Security Disability Insurance (SSDI), for disabled individuals, and their dependent family members, who have worked and contributed to the Social Security trust funds, and Supplemental Security Income (SSSI), which is a means-tested program based on income and financial assets for adults aged 65 years or older and disabled adults and children. Both programs require that claimants have a disability and meet specific medical criteria in order to qualify for benefits. SSA establishes the presence of a medically-determined impairment in individuals with mental disorders other than intellectual disability through the use of

standard diagnostic criteria, which include symptoms and signs. These impairments are established largely on reports of signs and symptoms of impairment and functional limitation. Psychological Testing in the Service of Disability Determination considers the use of psychological tests in evaluating disability claims submitted to the SSA. This report critically reviews selected psychological tests, including symptom validity tests, that could contribute to SSA disability determinations. The report discusses the possible uses of such tests and their contribution to disability determinations. Psychological Testing in the Service of Disability Determination discusses testing norms, qualifications for administration of tests, administration of tests, and reporting results. The recommendations of this report will help SSA

In this engaging book, Amber Reed provides a new perspective on South Africa ' s democracy by exploring Black residents ' nostalgia for life during apartheid in the rural Eastern Cape. Reed looks at a surprising phenomenon encountered in the post-apartheid nation: despite the Department of Education mandating curricula meant to teach values of civic responsibility and liberal democracy, those

who are actually responsible for teaching this material (and the students taking it) often resist what they see as the imposition of “ white ” values. These teachers and students do not see South African democracy as a type of freedom, but rather as destructive of their own “ African culture ” —whereas apartheid, at least ostensibly, allowed for cultural expression in the former rural homelands. In the Eastern Cape, Reed observes, resistance to democracy occurs alongside nostalgia for apartheid among the very citizens who were most disenfranchised by the late racist, authoritarian regime. Examining a rural town in the former Transkei homeland and the urban offices of the Sonke Gender Justice Network in Cape Town, Reed argues that nostalgic memories of a time when African culture was not

under attack, combined with the socioeconomic failures of the post-apartheid state, set the stage for the current political ambivalence in South Africa. Beyond simply being a case study, however, *Nostalgia after Apartheid* shows how, in a global context in which nationalism and authoritarianism continue to rise, the threat posed to democracy in South Africa has far wider implications for thinking about enactments of democracy. *Nostalgia after Apartheid* offers a unique approach to understanding how the attempted post-apartheid reforms have failed rural Black South Africans, and how this failure has led to a nostalgia for the very conditions that once oppressed them. It will interest scholars of African studies, postcolonial studies, anthropology, and education, as well as general readers interested in South African history

One of the most popular icebreakers when a group of anthroposophists gather is the question: "So how did you meet Anthroposophy?" Depending on how much time has passed since the initial encounter, the answer can take on more complexity and length. For this volume, editor Robert Hill has selected articles that illustrate a variety of these
