Ortho-Bionomy was created twenty years ago by Dr. Arthur Lincoln Pauls, an osteopath with training in the martial arts. Pauls wanted a system of bodywork which would teach structural understanding of the body simply and safely enough that anyone could learn to work with their family and friends. Kathy Kain gives clear descriptions of the philosophy and concepts of Ortho-Bionomy. The illustrations and easy-to-understand technical instructions show the standard releases taught in Ortho-Bionomy classes. The student is guided from the beginning of a session to the end, in learning this gentle, effective approach to somatic re-education. Ortho-Bionomy's primary benefit lies in helping people to break the cycle of pain by learning how to correct structural and somatic dysfunction and to release stress. This non-invasive, quick-acting approach is an effective preparation for mobilization, movement and therapeutic exercise.

Contains the adventures of the Doom Patrol, comprised of superheroes Robotman, Elasti-Girl, Negative Man, and their wheelchair-bound mentor known as the Chief, as they battle a horde of villains in defense of humanity.

Is nature all there is? John Haught examines this question and in doing so addresses a fundamental issue in the dialogue of science with religion. The belief that nature is all there is and that no overall purpose exists in the universe is known broadly as 'naturalism'. Naturalism, in this context, denies the existence of any realities distinct from the natural world and human culture. Since the rise of science in the modern world has had so much influence on naturalism's intellectual acceptance, the author focuses on 'scientific' naturalism and the way in which its defenders are now attempting to put a distance between contemporary thought and humanity's religious traditions. Haught seeks to provide a reasonable, scientifically-informed alternative to naturalism. His approach will provide the basis for lively discussion among students, scholars, scientists, theologians and intellectually curious people in general.
