This year, 2008, we had a very special Annual Symposium of the Deutsche Arbeitsgemeinschaft für Mustererkennung (DAGM) in Munich, and there are several reasons for that. First of all, this year was the 30th anniversary of the symposium. This means that the first symposium was organized in 1978 and the location of this event was: Munich! Just two years before, in 1976, the DAGM was founded in: Munich! And Munich was also the location of two further DAGM symposia, in 1991 and in 2001. When I attended the conference in 2001, I was in negotiations for my appointment to the Chair of Human-Machine Communication at the Technische Universität München (TUM) and certainly I did not at all anticipate that I would have the pleasure and honor to host this conference just seven years later again in Munich for its 30th anniversary. But special dates are not the only reason why DAGM was somewhat different this time. This year, DAGM was organized in conjunction with Automatica, the Third International Trade Fair for Automation in Assembly, Robotics, and Vision, one of the world's leading fairs in automation and robotics. This was an ideal platform for the exchange of ideas and people between the symposium and the fair, and the conference thus took place in a somewhat unusual but extraordinary location, the International Congress Center (ICM), in the direct vicinity of the New Munich Trade Fair Center, the location of the Automatica fair. With free access to Automatica, the registrants of DAGM got the opportunity to make full use of all the synergy effects associated with this special arrangement.

Paper dolls to cut out, with costumes representative of the turn of the century to World War I.

Even today, with the proliferation of fancy electronics, computers, and video games, people are still enchanted by the simple, funny movement created by a flat, two-dimensional paper puppet; they are automatically, and inherently, amusing. This book teaches readers how to make a wide variety of moveable paper puppets, charming toys, and novel, artful gifts. The projects are beautiful, magical, whimsical and will appeal to readers with many different craft interests. There is something very childlike about puppets, yet they are not easily dismissed into something strictly 'for children'. Paper puppets are versatile, easy to make, and can be used
