"The Boy In 7 Billion" is the extraordinary story of Deryn Blackwell, who was diagnosed with leukaemia at the age of ten and a couple of years later with Langerhans sarcoma as well. The story is beautifully told and I can only imagine the pain the family has suffered as they watched treatments perpetrated on Deryn with different degrees of success.

In a forthcoming book *The Boy in 7 Billion*, Callie Blackwell claims that cannabis oil, which she had started giving her son Deryn to relieve his symptoms during a bone marrow transplant for two cancers, actually saved his life when the bone marrow transplant appeared to be failing.

Unfortunately, her story appears to be another testimonial that confuses correlation with causation.

himself and rural China will  
captivate and enthrall readers.

Pulitzer Prize-winning journalists Mark Johnson and Kathleen Gallagher chronicle the story of Nic Volker, the Wisconsin boy at the center of a daring breakthrough in medicine--a complete gene sequencing to discover the cure for an otherwise undiagnosable illness. At just two years old, Nic experienced a searing pain that signaled the awakening of a new and deadly disease. For years, through false starts and failed cures, Nic holds on to life, buoyed up by his mother's fierce drive to get him the care he needs. But when even the world's experts are stumped by Nic's illness, his doctors come

Story Of The Year  
up with a radical, long-shot plan: a step into the unknown. The next major scientific frontier, following the completion of the Human Genome Project, was to figure out how to use our new knowledge to save lives--to bring genomic or personalized medicine into reality. The quest is undertaken by researchers around the world, but it is only when geneticist Howard Jacob hears about young Nic that the finish line finally comes into sight: It's no longer a race to make history. It's a race to save this boy's life.--Adapted from dust jacket.

Moneyball meets medicine in this remarkable chronicle of one of the greatest scientific quests of our time—the groundbreaking

program to answer the most essential question for humanity: how do we live and die?—and the visionary mastermind behind it. Medical doctor and economist Christopher Murray began the Global Burden of Disease studies to gain a truer understanding of how we live and how we die. While it is one of the largest scientific projects ever attempted—as breathtaking as the first moon landing or the Human Genome Project—the questions it answers are meaningful for every one of us: What are the world's health problems? Who do they hurt? How much? Where? Why? Murray argues that the ideal existence isn't simply the longest but the one lived well and with the least

Story Of The Year  
illness. Until we can accurately measure how people live and die, we cannot understand what makes us sick or do much to improve it. Challenging the accepted wisdom of the WHO and the UN, the charismatic and controversial health maverick has made enemies—and some influential friends, including Bill Gates who gave Murray a \$100 million grant. In *Epic Measures*, journalist Jeremy N. Smith offers an intimate look at Murray and his groundbreaking work. From ranking countries' healthcare systems (the U.S. is 37th) to unearthing the shocking reality that world governments are funding developing countries at only 30% of the potential maximum efficiency when it
